

PROJECT: SAREE BOUTIQUE MANAGEMENT SYSTEM

Entity: Saree:

A Saree Boutique Management System, an entity represents a real-world object whose information is stored in the database. The main entities are:

- Customer
- Saree
- Order
- Payment

Example: A Saree is an entity because the system stores its details such as Saree_ID (SR101), Saree_Name (Kanchipuram Silk Saree), Saree_Type (Silk), Color (Red), Price (₹3,500), and Stock (15).

Attributes:

In the Saree Boutique Management System, attributes are the properties or details of each entity

Example: The **Saree** entity has attributes such as Saree_ID, Saree_Name, Saree_Type, Color, Price, and Stock.

Saree id	Saree name	Saree type	Colour	Price	stock
S109	Kanchipuram silk	silk	Red with green	3500	24

Primary Key

In the Saree Boutique Management System, a Primary Key is a unique attribute used to identify each record in an entity.

Example: Saree_ID uniquely identifies each saree, and **Customer_ID** uniquely identifies each customer.

Saree id	Saree name
S109	Kanchipuram silk

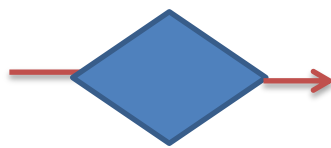

Relationship:

In the **Saree Boutique Management System**, a **relationship** shows how the entities are connected. A customer places orders, an order contains sarees, and each order is associated with one payment.

Example:

1.CUSTOMER → ORDER

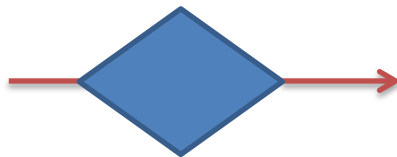

CUSTOMER ID	CUSTOMER NAME
C109	RAVI
C110	POOJA
C111	PRIYA

ORDER ID	ORDER NAME
O023	RAVI
O024	POOJA
O025	ABI
O026	PRIYA

2.ORDER → CUSTOMER SAREE

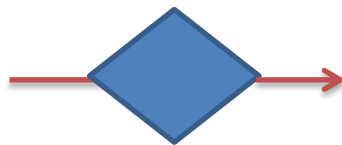

ORDER ID	ORDER DATE
O123	6-09-2022
O124	09-06-2025
O125	05-09-2026

PRODUCT NAME	PRODUCT ID
PO13	KANCHI SILK
P014	STONE SAREE
P015	POONOM SAREE
P016	BANNARS SILK

3.ORDER → PAYMENT

ORDER ID	ORDER DATE
